Trailers

Get out more

Get more out of Indespension's superb range of Daxara Trailers

Fancy a great outdoor adventure?

Need to overhaul the garden or the house?

Have to transport refuse to the tip?

Most of us have one or all of these situations at various times - but our cars are not big enough to hold the luggage, equipment, bicycles... let alone the family! Garden and household refuse leaves your car full of dirt, scuffs and scratches.

Of course there are many alternatives to help solve these simple but problematic situations;

Hire a skip? Expensive, considering the limited length of hire. A skip cannot be moved after it has been delivered to your house and once it is full, there is nothing more you can do until it has been removed or replaced.

That's not to mention the complaints from your neighbours!

Hire a van? Again, an expensive option and the hire period is limiting.

The most cost efficient and flexible alternative to all these situations is to purchase one of Indespension's excellent range of Daxara trailers!

Versatile and hard wearing, the Daxara can be used for all your trips, DIY collections, waste disposal, heavy/large item collection (with no delivery charge!) - the list is endless.

The Daxara range offers a comprehensive selection of sizes, with the varied, flexible and

affordable range of accessories to suit all purposes, from cycle rails to side extensions.

With excellent attention to all details (which are standard throughout the range), the Daxara is ideal for both domestic and light commercial use.

All in all the Daxara range of trailers and accessories provides excellent value for money, coupled with flexibility of use at an affordable price.

An excellent purchase for the adventurous and the home owner alike. Why consider any other option?

Leisure Trailers

All have straight drawbars and single skin sides

Technical Specifications

- Tyre size 480 x 8
- Tipping feature.
Stores on end

Leisure Trailers are perfect for adventuring and light household chores, anything from carrying extra luggage and bicycles, to moving garden waste that most bin men won't touch. To literally top it off, when you are done with your chosen activity, they may be stored on their rear end taking up less floor space. There are five sizes in the range capable of carrying loads of 295kg to 505kg.

Technical Specifications

DAXARA 137

- Gross weight 450kg

- Internal dimensions:
1.45 x 1.00 x 0.40m
- Unbraked single axle
- Tyre size 500 x 10
- Tipping feature. Stores on end

If you are thinking of harder work more than leisure, then we would advise that you look at the Light Commercial and Heavy Duty Braked Trailers. For extra strength and security for your load, these have A-frame drawbars made to cope with denser and heavier materials like cement, sand, gravel and the like.

Hydraulic shock absorbers increase safety and a special adjustable locking handle (shown right) allows you to simply tip the trailer without unnecessary physical exertion.

DAXARA 158

Technical Specifications

- Gross weight 650kg
- Unladen weight 110kg
- Maximum carrying capacity 540kg
- Internal dimensions: 1.45 x 1.00 x 0.40m
